Introduction

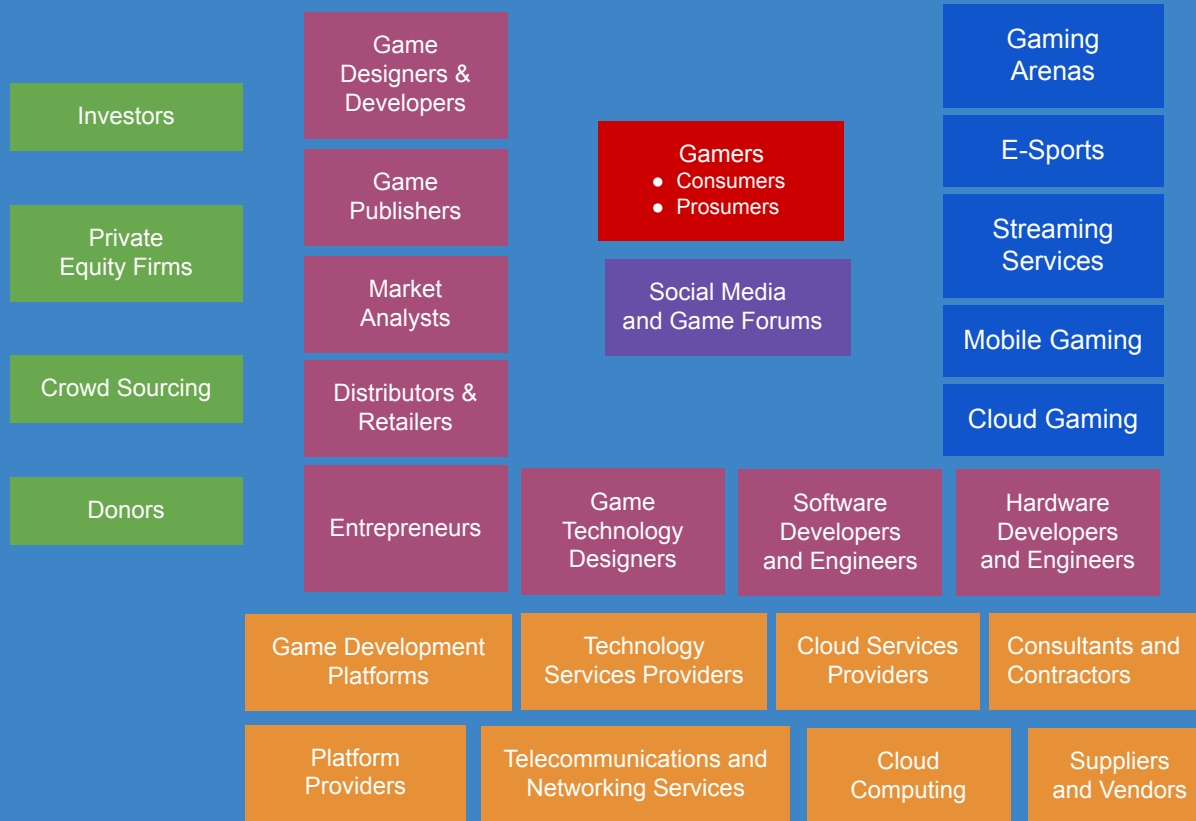

The Video Game Industry will continue to grow in the foreseeable future. The industry is fueled by the continuing increase in Digital Technologies and Artificial Intelligence developments, and by the passion of people (developers and consumers) to create and play games. The industry today includes practically all age groups, many of whom are becoming prosumers - producers or creators of games, and consumer of games. The industry's game genres and subgenres are growing as fast as those for fiction in the literary world. The experience and satisfaction that both game developers and gamers gain continue to reach higher levels as the digital, AI, and 3D and animation technologies increase in power.

Possessing knowledge of industry sectors and industry ecosystems including the players within them is more important today for both the professionals, and the younger generation who are pursuing their education and exploring career options. Pursuing a career in the video game industry should certainly be in every young person's radar.

This document provides a condensed summary of the players in the Video Game Industry Ecosystem. It sheds light into the a wonderful industry that continues to grow, and continues to attract very creative and highly innovative people of all ages.
